## INSIDE DATA

### “WAR OR PEACE?” (MOVIE #5)

TIMING	DATA/CONCEPT	SOURCE
00:24 – 03:05	Examples of historical water-related conflicts/ tensions and competing uses of water resources including: open defecation, sanitation issues, forced migrations, pollution, unequal allocation of water, disruption of hydraulic structures and water sources as warfare targets, unregulated urbanization, among others.	<p><b>WWDR 2015, p14:</b> “Human migration from rural to urban areas is posing a continuous challenge to the provision of basic drinking water and sanitation services, especially in poor peri-urban and slum areas, as well as to public health, in particular to prevent outbreaks of cholera and other water-related diseases (WHO and UNICEF, 2014a)”.</p> <p><b>p38:</b> “However, much still needs to be done – 748 million do not use an improved source of drinking water and 2.5 billion do not use an improved sanitation facility.”</p> <p><b>p40:</b> “Furthermore, the WHO and UNICEF JMP finds that one billion people do not use a sanitation facility and instead defecate in the open (WHO and UNICEF, 2014a)”.... “Lack of sanitation and poor management of excreta has a detrimental impact on the environment.”</p> <p><b>WWDR 200, p18, Climate change and water:</b> “Even if greenhouse gas concentrations stabilize in the coming years, some impacts from climate change are unavoidable. These include increasing water stress in many regions, more extreme weather events, the potential for large population migration and the disruption of international markets” .</p> <p><b>Water Conflict Chronology Timeline by the Pacific Institute</b>  <a href="http://www2.worldwater.org/conflict/timeline/">http://www2.worldwater.org/conflict/timeline/</a></p>
